Collating Climate/Sustainability Resources Across Harvard

Authored by Student Sustainability Associate Fang Chen

Climate and sustainability are heated topics nowadays, especially at Harvard. Even though there are plenty of resources across Harvard, few people know them well. To be fair, some people know what's happening in their schools, clubs, or projects. But there are multiple similar initiatives in different Harvard schools that work in silos. How can we create synergies across these different initiatives and schools to better drive the climate/sustainability agenda? How can we make the resources more accessible to the broader community?

With this question in mind, we initiated the **Collating Climate/Sustainability Resources Across Harvard Project** in November 2022. Our goal is to facilitate information exchange and enable activity planning, information sharing and research collaboration across Harvard with a one-stop, easy-to-use platform. We will focus on what we have and can do on climate & sustainability by collating University-wide resources.

In the project, we identified 4 major stakeholders:

- 1. Harvard schools that:
 - a. Offer academic courses on climate/sustainability
 - b. Provide administrative support for clubs and programs
- 2. Student Clubs that:
 - a. Initiate activity and discussions focusing on different perspectives of climate/sustainability
 - b. Provide platforms and information for students interested in specific climate/sustainability topics
- 3. Programs/Funding that:
 - a. Support research and provide hands-on experience for scholars and students who have specific interests in climate/sustainability
 - b. Fund on-going projects/initiatives to reduce environmental impact
- 4. **Offices** (e.g. Office for Sustainability, i-Lab) that develop and implement climate/sustainability campaigns and initiatives

The key inputs for this project will be **Content** and **Contact**.

• Content: Instead of generating original content, we will use materials that are generated and updated by school/club/program representatives. For visibility and

accuracy, content will be displayed on the AirTable platform, which should be updated bi-annually.

• Contact: We will provide organizational emails to the public. Name and email of representative could be provided upon request, and AirTable has the ability to integrate scheduling tools which we believe should be linked in the future.
